

Nicolý Dandara

Product Designer

nicolydndr@gmail.com | adandara.com | linkedin.com/in/nicolýdandara | Brazil | Remote

Summary

Product Designer, T-shaped across UX, UI, and code, designing software in-house at consumer scale and pairing directly with engineering rather than handing work off. Prototypes in Figma and in code, and uses AI tooling daily from discovery through production. Distills ambiguous problems and feedback into clear, focused solutions, and communicates them in writing.

Skills

Figma, prototyping, working within design systems, HTML/CSS, TypeScript, React and Next.js, accessibility, AI tooling (Claude Code), screens and flows, design critique and feedback, async written communication, usability testing and experiments, continuous discovery, Android, APIs and integrations.

Professional Experience

Sabbatical

Brazil | 03/2026 - Present

- A deliberate break after Stone, spent on thesis research and on the two projects listed under Projects.

Stone Co. — Product Designer

Remote, Brazil | 06/2022 - 03/2026 | Promoted from Junior to Mid-level, 04/2024

- Designed payment terminal software running across 22+ device models and 4.5M+ active payment terminals.
- Designed the Pix NFC payment flow as sole designer, defining its success criteria and delivering production-ready specs under a compressed timeline; 40%+ of the partner base adopted it within 6 months.
- Led 2 zero-to-one product launches, including the Stone Terminal Store, still live, across 3 platforms and 4 organizations, scoping and proposing the work and aligning cross-functional stakeholders.

QuintoAndar — Junior Product Designer

Remote, Brazil | 12/2021 - 04/2022

- Designed and shipped production features for Brazil's largest rental platform, running usability experiments inside a squad with engineering and product.

Education

Universidade Estadual de Minas Gerais — Bachelor's in Graphic Design

05/2021 - Present

- Thesis: Service Design Framework for Museum User Experience

Centro Federal de Educação Tecnológica de Minas Gerais — Technical Degree in Computing

05/2017 - 03/2021

Projects

adandara.com — Personal site and document pipeline

Design and front-end | 2026 | <https://adandara.com>

- Built an interruptible Web Animations API zoom layer with ARIA modals and an inert background, and a Playwright pipeline that turns markdown résumés into PDFs and verifies their ATS text layer.

In Service of Museums — Thesis research site

Research, design and front-end | 2026 | <https://servico-museu.vercel.app>

- Published a service design study as a site in Next.js, TypeScript and MDX, with sidenotes, an inline glossary, and fuzzy search over the institutions in the study's scope.
