

# Nicolý Dandara

Product Designer

nicolydndr@gmail.com | adandara.com | linkedin.com/in/nicolýdandara | Brazil | Remote

## Summary

Product Designer, T-shaped across UX, UI, and code, designing software in-house at consumer scale. Builds and improves design system components in production, pairing directly with engineering rather than handing work off. Prototypes in Figma and in code, and uses AI tooling daily from discovery through production. Distills ambiguous problems and feedback into clear, focused solutions, iterates quickly, and communicates them in writing.

## Skills

Figma, prototyping, design systems and components, HTML/CSS, AI tooling (Claude Code), mockups and high-fidelity visuals, screens and flows, design critique and feedback, async written communication, usability testing and experiments, rapid iteration, continuous discovery, Android, APIs and integrations.

## Professional Experience

### Stone Co. — Product Designer

Remote, Brazil | 06/2022 - 03/2026

- Built and maintained Stone's Android design system components in production, running across 22+ device models and 4.5M+ active payment terminals and delivering consistent, high-quality payment UX nationwide.
- Refined key screens and flows for a new payment technology as sole designer, defining success criteria and delivering production-ready specs under a compressed timeline, combining speed with craft.
- Led 2 zero-to-one product launches across 3 platforms and 4 organizations, scoping and proposing the work, distilling ambiguous problems into focused solutions, and aligning cross-functional stakeholders.

### QuintoAndar — Product Designer

Remote, Brazil | 12/2021 - 04/2022

- Designed and iterated on mockups, high-fidelity prototypes and production features for Brazil's largest rental platform, pairing with engineering and product through continuous discovery and delivery, running usability experiments and using qualitative and quantitative data and user feedback to drive decisions.

## Education

### Universidade Estadual de Minas Gerais — Bachelor's in Graphic Design

05/2021 - Present

- Thesis: Service Design Framework for Museum User Experience

### Centro Federal de Educação Tecnológica de Minas Gerais — Technical Degree in Computing

05/2017 - 03/2021

- Conclusion project: Serase, a mobile application for personal finances for low-income users

## Projects

- **Links Amarelos** — Self-published monthly newsletter of curated link roundups and original essays on media and internet culture, written and shipped async. <https://nydndr.substack.com>
- **Ondas Amarelas** — Self-produced podcast of long-form audio essays on media and culture, with original sound design. <https://open.spotify.com/show/043Gs7eyY2KOlotEWSTSxB>
- **Belo Rolê** — Public Notion directory of 200+ vetted venues in Belo Horizonte, structured with a custom taxonomy and information architecture. <https://nydndr.notion.site/belo-role>
- **Belo Museu, em números** — Data visualization dashboard built on open-source Brazilian museum datasets.
